

Dr. Arzu Erdem , Prof

PhD (ITU), MSc (ITU), BSc (ITU). Arzu Erdem's research focuses on Contemporary Design Theories, and the effects of Information Technologies on architectural design theory and practice. She is currently coordinating/teaching graduate and undergraduate level architectural design studios in Istanbul Technical University, Faculty of Architecture and Istanbul Bilgi University. Her pedagogical research explores environments that support creative design process. She has designed several architectural projects and contributed to architectural design competitions and was a member of the design team of *Istanbul Water Civilizations Museum* that received National Architectural Award for Building Conservation and Sustentation Achievement in 2012. Her professional experience includes design consultancy for public and private companies.
